

ALTAN MCS

Tanning Auxiliaries | Chrome Complexing Agent

Chemical Composition

Altan MCS is a proprietary complexing salt blend with multifunction.

In chrome tanning bath, **Altan MCS** makes leather flat and full along the flanks and bellies, resulting in a uniform touch and fullness.

In chrome tanning bath, **Altan MCS** increases chrome fixation and reduces chrome content in the waste water.

Altan MCS assisting dye penetration in wetblue retanning stage.

Altan MCS improves vegetable leather fullness in retanning stage.

Application

- A.** All types of hides: pickling bath: add 1.3-1.5% pelt weight together with salt, run for 30 minutes.
- B.** All types of wetblue: rechroming bath: add 2-4% shave weight before addition of chrome, run for 30 minutes.
- C.** All types of wetblue: shoe upper: dyeing bath: add 2-4% shave weight before addition of dyestuffs, run for 30 minutes.
- D.** Vegetable leather: retanning bath: add 2-4% shave weight.
