

ALTAN MC

Tanning Auxiliaries | Chrome Complexing Agent

Chemical Composition

Altan MC is a proprietary complexing salt blend for pickling and rechroming.

Altan MC fills along the flanks and bellies, resulting in a uniform touch and fullness.

Altan MC assists in making the wet blue color to a uniform light blue.

Altan MC performs exceptionally well when used in the pickling bath in conjunction with electrolyte stable fatliquors such as **Eurekanol 50MD**.

In pickling bath, **Altan MC** improves chrome exhaustion.

Altan MC will enhance whiteness of white leather, make pastel shades brighter and at the same time will not bleach dark shades.

Application

- A.** All types of hides: pickling bath: add 1.3-1.5% pelt weight after salt, run for 30 minutes
- B.** All types of wetblue: rechroming bath: add 2-3% shave weight before addition of chrome, run for 30 minutes

Properties

Appearance:	Clear Liquid
Analysis:	pH 11.0-13.50
Active Ingredient:	42-45%
Density:	1.25-1.30 KG/L
Stability:	Pickling and Rechroming Bath
Storage Condition:	Optimum Condition is between +5C and +30C. If frozen, defrost and stir thoroughly before use. Keep in cool and well ventilated warehouse.
Shelf Life:	Up to 12 months in the original packing condition.

Packing

150KGS Plastic Drums
