

CATIONOL ADD

Cationic Fatliquor

Chemical Composition

Cationol ADD is a cationic fatliquor suitable for top fatliquoring bath.

Cationol ADD is based on vegetable oil derivatives.

Cationol ADD is ideal for top dyeing bath. It enhances the brilliancy and depth of the shades and significantly saving the dyestuffs dosage.

Cationol ADD is gives smooth and pleasant handle on the leather surface.

Cationol ADD is most suitable for drum dyed articles and it does not interfere with finishing operations in terms of blocking the absorption or adhesion of finishing chemicals.

Cationol ADD has good lightfast and stability.

For best results, **Cationol ADD** should be diluted 1:10 with COLD water before application.

Application

A. NOT SUITABLE for rechrome bath.

B. SENSITIVE to anionic chemicals. **Cationol ADD** will coagulate and precipitate as white lump from the bath if coming into contact with metal ions, retanning and anionic fatliquoring agents.

C. Top fatliquoring bath: long float. 1.0-2.0% **Cationol ADD** 15'.

D. Top dyeing bath: after dyestuffs complete absorption. Long float. 1.0-2.0% **Cationol ADD** 15'.

Properties

Appearance: White Liquid

Analysis: pH 3.0-4.0

Active Ingredient: 30-32%

Ionic Charge: Cationic

Stability: Topping bath only.

NOT compatible to most anionic chemicals used in rechroming neutralization, retanning and main fatliquor bath. Not stable to chrome and aluminum salts.

Storage Condition: Optimum Condition is between +5°C and +30°C.

If frozen, defrost and stir thoroughly before use.

Keep in cool and well ventilated warehouse.

Shelf Life: Up to 18 months in the original packing condition.

Packing

120KGS Plastic Drums
