

# YOLKANOL IN

Lecithin Fatliquor

## Chemical Composition

**Yolkanol IN** is a compound fatliquor based on natural oils, phospholipids and synthetic softeners, suitable for all types of soft leather.

**Yolkanol IN** has medium penetration and imparts smooth surface touch.

**Yolkanol IN** is suitable for brilliant color to dark color leather with even dyeing.

**Yolkanol IN** is able to exhaust even with very high dosage and will not deposit on the grain causing sticky and dark grain.

**Yolkanol IN** has excellent lightfastness.

**Yolkanol IN** has strong affinity to leather fiber and will not be washed away easily.

For best results, **Yolkanol IN** should be warmed up to 25-35C before emulsified with 40-50C water.

## Application

**A.** Upholstery: up to 20% **Yolkanol IN**.

**B.** Suede shoe upper: up to 5% **Yolkanol IN**.

**C.** Handbag leather: 8-10% **Yolkanol IN**.

## Properties

Appearance: Yellow Paste

Analysis: pH 6.2-7.8

Ionic Charge: Anionic

Stability: Compatible to most anionic chemicals used in neutralization, retanning and main fatliquor bath. Not stable to chrome and aluminum salts.

Storage Condition: Optimum Condition is between +5C and +30C. If frozen, defrost and stir thoroughly before use. Keep in cool and well ventilated warehouse.

Shelf Life: Up to 12 months in the original packing condition.

## Packing

120KGS Plastic Drums
